

Vadara Quartz surfaces are manufactured with natural quartz, combined with pigments and resins which make the surface highly durable.

Vadara can be used in virtually any residential or commercial indoor surfacing application, and is the ideal choice for kitchen countertops and back splashes, bathroom vanities, bath surrounds and wall paneling. All Vadara quartz surfaces offer superior properties of strength and durability including low porosity, and high resistance to stains, scratches and household cleansers.

Chemical Resistance

Household Chemicals

Ammonium Chloride (100g/l) — No Visible Effect

Swimming Pool Salts

Sodium Hypochlorite (20mg/l) — No Visible Effect

Acids and Alkalines

Hydrochloric Acid (3%) — No Visible Effect

Lactic Acid — No Visible Effect

Potassium hydroxide (30 & 100g/l) — No Visible Effect

Strength and Durability
